

**MULTIPOWER
INTERNATIONAL, INC.**

PART NO: 810
DRAWING NO: TABULATION

DESCRIPTION

SUPERHEATER UNITS TYPE A

Type A superheater units will be custom manufactured to your specifications using the attached tabulated drawing/order form. The unit assemblages utilize machined steel ball ends welded to seamless steel tubing welded to one piece of forged steel return bends. Superheater clamps are cast steel with forged steel header bolts. The units are designed for use in locomotives with dome-mounted throttle valves. Inquiries for type A and type E superheater units for use in locomotives equipped with front end throttles are invited.
