PART NO: 660

DRAWING NO: 10.314.01

DESCRIPTION

WATER GLASS ASSEMBLY

This water glass assembly is a complete kit with all parts necessary to replace water glasses of many types. It comes with a reflex type water gauge. The reflex gauge glass causes the level of the water to appear in contrast to the level above the water. The connections to the boiler will be supplied blank, to be threaded to suit the customer's requirements. The drain valve is threaded for 3/8" pipe. The water glass housing and valves are cast bronze. The pipe from the upper valve to the top of the water glass is copper.
